

Correction to January 15, 2008 Update  
January 28, 2008

Information I received at the core group meeting on December 10th and an email from Rob McAleer (MEMA Director) on Jan. 14th were used in writing my January 15, 2008 Update. I need to correct the following statement from that update:

"MEMA received and accepted Ray Fortier's engineering report by Wright Pierce Engineers sometime in November but after their deadline."

I obtained, over the weekend, a copy of Rob McAleer's January 9, 2008 enforcement letter to Ray Fortier and it clearly states that:

"this agency [MEMA] still has not received a remedial action plan that satisfies the requirements of the outstanding Dam Safety Orders. ... Penalties have been accruing at the rate of \$500 per day since October 25, 2007, and are continuing to accrue, for failure to submit a remedial action plan meeting the requirements of the Dam Safety Orders. Additional penalties of \$500 per day are now accruing for failure to complete repairs to the dam by December 31, 2007."

If you have passed on my January 15, 2008 Update, please forward this correction as well.

Thank you,  
Judy Hamilton
