

## Temporary Dam Repaired June 24, 2009

Good news – today we had a tremendous effort at repairing the breach under the dam and completely reinforcing the whole structure. The dam is repaired now and the water came up a foot or more just today while we worked on it. I suspect we will be back to good levels on the lake sometime tomorrow with all the water in the brooks from all this rain. Thank you to all the folks that helped us out today. Also, there have been several very generous donations to the Canton Dam Fund to help with the repair – thank you to all you who donated some money.
